DDNEA FOR EMCS PHASE 2	VER: 2.23-EN
APPENDIX B: CODELISTS	
INTRODUCTION	

Introduction

This appendix lists the available code lists in order of code list number:

- The Technical Codes for which the values given here in the DDNEA for the Phase 2 are definitive.
- The Business Codes (those identified in the FESS) for which the definitive values are those loaded into the Common Services Reference Data and available for download to NAs. Therefore, those values are not presented or only presented for information.

Each code list is structured as follows:

Number	Number used in DDNEA Appendix C Correlation tables.
Name	Name, in most cases resembling the name of the relevant attribute(s).
Format	Type of code and thus of the attributes to which the code list applies.
Technical	A flag to indicate if the codelist as a whole is a Technical Codelist.
Details	Exceptions, relevant attributes.
Code	Values.
Description	Meaning of each value.
Remarks	Exceptions or remarks concerning a particular value.
TC	Flag to denote if this code is a Technical Code.

Note that the codes included in Business Code Lists will be maintained by the EMCS CS/RD, since the Business Code Lists as whole are maintained by EMCS CS/RD.

Please also note that due to a technical limitation of the Adobe Acrobat Writer, some characters may not be displayed properly.

Additional codes can be defined at national level in a separate National Code List. These codes will only be used within the National and External Domains and NOT the Common Domain. Therefore they will be under the control of the National Helpdesk and will be communicated within that NA.

CODE VALUES FOR 'REMINDER MESSAGE TYPE'	

48 Reminder Message Type

Format n1

Technical ☒

Details:

Code	Description	Remarks	TC
1	Reminder message at expiry of time to change destination		<input checked="" type="checkbox"/>
2	Reminder message at expiry of time to send the report of receipt		<input checked="" type="checkbox"/>

PHASE 2	REF: ECP2-FITSDEV2-DDNEA_P2_APP_B
DDNEA FOR EMCS PHASE 2	VER: 2.23-EN
APPENDIX B: CODELISTS	
CODE VALUES FOR 'FUNCTIONAL ERROR CODES'	

49 Functional Error Codes

Format n..5

Technical ☒

Details:

Code	Description	Remarks	TC
0	Other	This value should be used only when the error does not correspond to any of the following values. It must be stressed that the value of zero should only be used for intra-release migration issues.	<input checked="" type="checkbox"/>
12	Incorrect (code) value	Value of an element in a message is outside the predefined domain or not part of the applicable code list.	<input checked="" type="checkbox"/>
15	Not supported in this position	An element is not allowed to have a value due to the following two reasons: - The element is not allowed to be present according to the FMS message specification. - The element is not allowed to be present according to some additional condition.	<input checked="" type="checkbox"/>
26	Duplicate detected	The same interchange is received again. Duplication is detected by reception of an interchange reference that has already been received.	<input checked="" type="checkbox"/>
90	Unknown ARC	The ARC of the received FMS is not known, whereas it is expected to be known.	<input checked="" type="checkbox"/>
91	Duplicate LRN	The LRN of the received FMS is already known and is therefore not unique according to the specified rules.	<input checked="" type="checkbox"/>
92	Message out of sequence	The message can not be processed, because the receiver is not in a proper state.	<input checked="" type="checkbox"/>
93	Invalid ARC	The structure of the ARC is not conform specifications given in FESS	<input checked="" type="checkbox"/>
