Summary

This document describes the XML format used for electronic filing of income statements.

1 Document information

1.1 Target group

This document is intended for software companies and information providers using their own systems to generate income statement files.

The technical description is available only at the Skatteverket web site (ref[2]); it is not available in print.

1.2 Terms and definitions

XML = eXtensible Markup Language. A standard for structured text based representation of information.

XML Schema = A set of rules describing permitted syntax and grammar in an XML document. A schema file has the suffix .xsd.

Parse = Divide a text into parts and interpret their meaning.

Meta data = Data about data, that is, a description or statement about a piece of data.

1.3 Referenser

Ref	Title	Editor	Address
[1]	XML schema for testing income statement files	Skatteverket	www.skatteverket.se/ku2015xml

XML-struktur	2016-03-17

2 Table description

This document describes the terms included in the electronic filing of income statements.

The XML schema (ref[1], including the XML string, are based on the details in this description.

Explanation of the columns in the following tables:

- Term/Field
 - Description: Description or field name from the corresponding form.
 - Code: Field code in applicable cases.
- Element name in XML: The element found in the XML schema.
- No.: Number of occurrences of the current group/term in the enclosing group. The following variants occur:
 - 0-1: Zero or one occurrence, i.e., the group/term is not compulsory. Marked "minOccurs="0"" in the schema. The description column specifies when the group/term should and should not be notified.
 - 1: One occurrence, i.e., the group/term is compulsory. No marking the schema (default).
 - 0-n: Zero or more occurrences. Applies only to groups. Marked "minOccurs="0" maxOccurs="unbounded"" in the schema.
 - 1-n: One or more occurrences. Applies only to groups. Marked "maxOccurs="unbounded"" in the schema.
- Type: Specifies if it is a group ("Grp") or a term with a reference to the value store (Appendix 1).
- Controls
 - ID: Identification label applied to the control.
 - Description: Textual description of the control.
- Color coding:

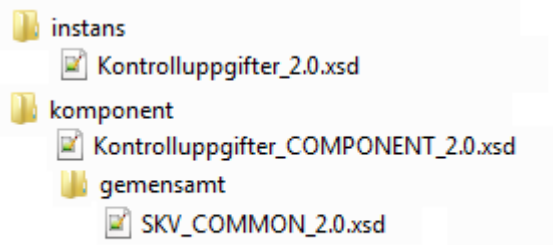

Group element

XML-struktur	2016-03-17

3 General information

3.1 Validation against XML-schema

Generated XML files can be validated against an XML schema published in accordance with ref [1]. Skatteverket's schema layer is a common storage area which facilitates reuse and access of Skatteverket's public XML schemas. The schema is structured in the following way:

3.2 Character set

Skatteverket supports the UTF-8 character set for income statement files (8-bit Unicode transformation format).

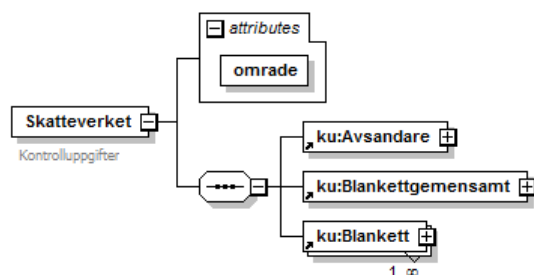

3.3 Suffix

It is very important that from all elements that are derived from the component schema (Kontrolluppgifter_COMPONENT_<version>.xsd) uses the suffix “ku:” since there are more controls beyond the schema validation that requires this suffix. If another suffix is used the XML-file will not be validated in these controls and thus be rejected. See example files (appendix 4) for more details.

SKV 260 appendix 2	Version: 2.0
XML-struktur	2016-03-17

4 Overall hierarchy

The following diagram illustrates the overall hierarchy of electronic filing of income statements. The attribute “omrade” of the root element “Skatteverket” should be set to ”Kontrolluppgifter”.

4.1 Skatteverket – Income statements

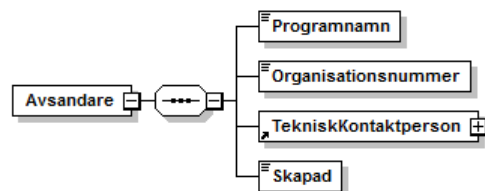

Term/Field		Element name in XML	No.	Type	Controls	
Description	Code				ID	Description
Skatteverket, root element. Compulsory Attribute: omrade="Kontrolluppgifter"		Skatteverket	1	Grp		
Information of sender		Avsandare	1	Grp		
Form information shared by all forms included in the file		Blankettgemensamt	1	Grp		
Forms content and case information		Blankett	1-n	Grp		

SKV 260 appendix 2	Version: 2.0
XML-struktur	2016-03-17

5 Common file information

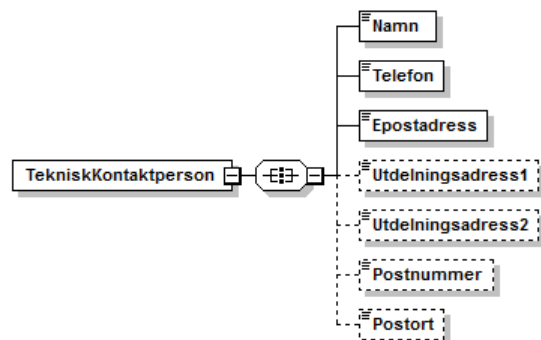

This section illustrates the hierarchy of the information common to all forms in the file.

5.1 Avsändare (Sender)

Term/Field		Element name in XML	No.	Type	Controls	
Description	Code				ID	Description
Software name used to produce the file		Programnamn	1	Text50		
File producers Identification number.		Organisationsnummer	1	Identitet		
Information of technical contact person at the file producer		TekniskKontaktperson	1	Grp		
Time the file was created.		Skapad	1	Skapad		

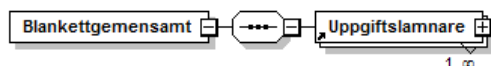

5.1.1 Teknisk kontaktperson (Technical contact person)

SKV 260 appendix 2	Version: 2.0
XML-struktur	2016-03-17

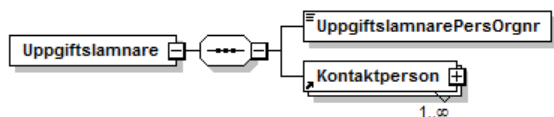

Term/Field Description	Code	Element name in XML	No.	Type	Controls	
					ID	Description
Technical contact persons name		Namn	1	Text50		
Technical contact persons phone number		Telefon	1	Text20		
Technical contact persons email (receipt on file via eTransport is sent here)		Epostadress	1	Epost		
Senders address 1		Utdelningsadress1	0-1	Text50		
Senders address 2		Utdelningsadress2	0-1	Text50		
Senders Postal code		Postnummer	0-1	PostNummer		
Senders postal location		Postort	0-1	Text30		

5.2 Blankettgemensamt (Common forms content)

Term/Field Description	Code	Element name in XML	No.	Type	Controls	
					ID	Description
All information providers existing in the file.		Uppgiftslamnare	1-n	Grp		

5.2.1 Uppgiftslamnare (Information provider)

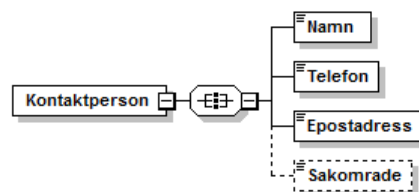

Term/Field Description	Code	Element name in XML	No.	Type	Controls	
					ID	Description
Identification of information provider. More than one can exist.		UppgiftslamnarePersOrgnr	1	Identitet		

SKV 260 appendix 2	Version: 2.0
XML-struktur	2016-03-17

Term/Field Description	Code	Element name in XML	No.	Type	Controls	
					ID	Description
Information providers contact person		Kontaktperson	1-n	Grp		

5.2.1.1 Kontaktperson (Contact person)

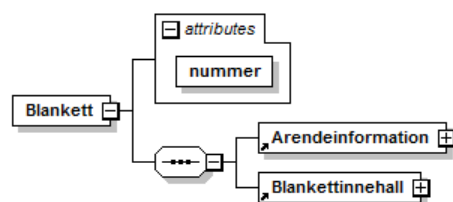

Term/Field Description	Code	Element name in XML	No.	Type	Controls	
					ID	Description
Contact persons name		Namn	1	Text50		
Contact persons phone number		Telefon	1	Text20		
Contact persons e-mail		Epostadress	1	Epost		
Area of expertise for contact person		Sakomrade	0-1	Text50		

SKV 260 appendix 2	Version: 2.0
XML-struktur	2016-03-17

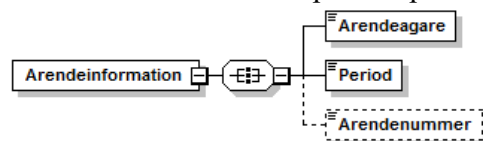

6 Form entries

The file can contain one or more form entries. The form element can have an attribute where the Skatteverket form number (SKV number) is entered in the area for income statements. For more information, see the Skatteverket web site (ref[2]), or chapter 7 in this document. The following diagram illustrates the hierarchy of the form entries.

6.1 Case information

The table column “Description” specifies how the elements should be applied for the income statements area.

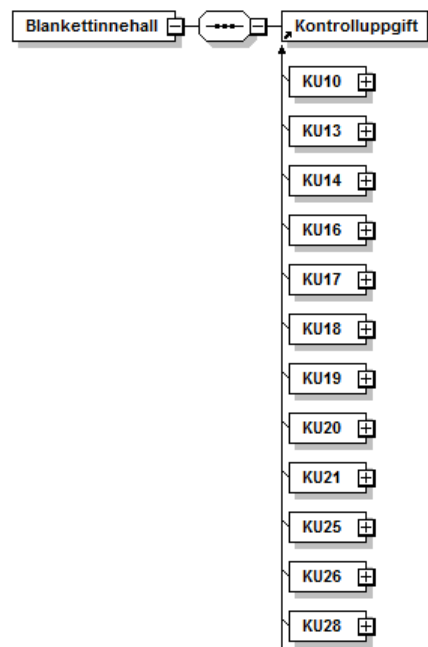

Term/Field		Element name in XML	No.	Type	Controls	
Description	Code				ID	Description
Equal to information providers Id number (UppgiftslamnarId) from the form element		Arendeagare	1	Identitet		
Equal to income year (Inkomstar) from the form element		Period	1	Text20		
Skatteverkets case number (do not use for income statements)		Arendenummer	0-1	Text13		

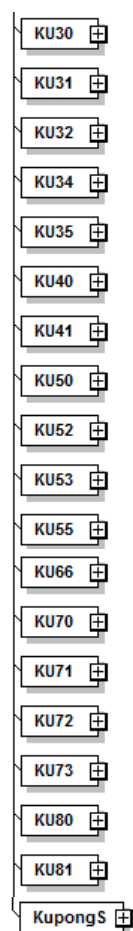

SKV 260 appendix 2	Version: 2.0
XML-struktur	2016-03-17

6.2 Income statement forms

The element has an abstract subgroup called “Kontrolluppgift” that is exchanged for any of the different income statements types described in the following chapter. Certain elements require the fixed attribute “faltkod”. Information about which field code corresponds to which element is found in the table of each form type, and also in chapter 7 in this document.

7 Attributes

This chapter describes the attributes that should be applied to certain elements in the income statement file.

7.1 Attribute "omrade" in element "Skatteverket"

The attribute is compulsory and should be set to "Kontrolluppgifter".

7.2 Attribute "nummer" in element "Blankett"

The attribute is compulsory and should be the SKV number of the income statement form specified in the element "Blankettinnehall".

The following table shows the connection between number and form.

SKV 260 appendix 2	Version: 2.0
XML-struktur	2016-03-17

Swedish income statements:

SKV-number	Form, Description
2300	KU10 – Income statement from employers etc.
