EU Customs Global and Interaction BPM Report	
INTRODUCTION	

1. Introduction

1.1. Document Purpose

The purpose of the Excise Global and Interaction BPM Report is to reflect the information shown in the Excise Global BPM and the L2 Interaction BPMs and will provide further explanation to the reader on how to interpret these BPMs.

1.2. Scope

The Excise Global BPM overview is limited to the scope of the Excise business domain. The Excise Global BPM provides an overview of all Excise business domains and how those business domains interact with each other.

The L1 Excise Global BPM and the L2 Excise Interaction BPMs are hierarchically linked to each other. This relationship as well as the relationship with other models in ARIS is explained in the Levelling Guidelines [R01].

1.3. Deviation From TEMPO

The following TEMPO sections are not part of this document:

- Sign Off list;
- Distribution List;
- Glossary of Terms;
- Applicable Documents.

The following TEMPO sections are added to this document:

- Project Ownership;
- Intended Audience.

1.4. Assumption and Constraints

The reader should have a basic knowledge of the Levelling guidelines [R01].

1.5. Project Ownership

The unit DG TAXUD/C2 is the project owner of the Excise Global BPM.

1.6. Intended Audience

The intended audience for this document includes:

- Any person of DG TAXUD business and legal units working in the Excise Business Domain;
- Any person of the development team of DG TAXUD/C5 who will use this document as a reference during the development cycle;
- Any person from the DG TAXUD units who has to verify whether the current document is consistent with the applicable documents and depicts the solution to be followed;
- Any person from the Member State Administration (MSA) or Trade representatives who have to identify the actions, implications and consequences on their National Domain, including both business people and people having an IT background.

1.7. Structure of the Document

This document is split into the following chapters:

EU Customs Global and Interaction BPM Report	REF: EU Customs Global and Interaction BPM Report for Excise
EU Customs Global and Interaction BPM Report	
INTRODUCTION	

- Chapter 1 "Introduction" includes the document Purpose, Scope, Deviations from TEMPO, Assumptions and Constraints, Project ownership and Intended audience;
- Chapter 2 "References" includes acronyms, abbreviations and reference documents;
- Chapter 3 "Document History" provides the history of the report;
- Chapter 4 "L1 Excise Global BPM" represents an overview of the Excise business domains;
- Chapter 5 "L2 Excise Interaction BPMs for Core business domains";
- Chapter 6 "L2 Excise Interaction BPMs for Enabling business domains";
- Chapter 7 "L1 Excise Global BPM Matrix".

L1 EXCISE GLOBAL BPM	

4. L1 Excise Global BPM

4.1. Model Type Description

The L1 Global BPM for Excise is grouped into two types of business domains; one group containing the Core business domains and a second group containing the Enabling business domains. The Core business domains group consists of Core business domains that are directly related to the movement of goods, the Enabling business domains group consists of Enabling business domains that facilitate the Core business domains. This implies an enabling process delivers output that can be used by a core process to effectively execute the process.

In addition a Global Business Data group is added on the L1 Excise Global BPM. Those Global Business Data show the data that can be exchanged between Excise business domains. This interaction between enabling and core processes via Global Business Data is shown on the L2 Excise Interaction BPMs.

4.3. Business Domains

Domain Name	Domain Description
Administrative Cooperation	This Core Business Domain encapsulates all processes enabling MSAs to (1) control the holding and movement of goods under duty suspension arrangements, and (2) verify the movement of goods subject to excise duty after their release for consumption.
Duty Paid B2B	This Core Business Domain encapsulates all processes that make up the business life cycle of excise movements under the Duty Paid Business to Business regime.
Guarantee Management	<p>This Enabling Business Domain encapsulates the guarantee management processes necessary to assure the proper handling of guarantees (such as, lodging and release of guarantees) throughout the execution of the processes within the Core Business Domains (excluding the Customs Supporting Procedures*).</p> <p>In accordance with the legislation (Art.34 2008/118/EC) the arrangements for guarantees and payment are specified, whereas for duty suspension (Art.18 and part of 19 2008/118/EC), the arrangements are left up to Member State.</p> <p>(*It shall be noted that in the context of Excise, Guarantee Management does not concern the Customs Supporting Procedures.)</p>
Guarantee Management	<p>This Enabling Business Domain encapsulates the guarantee management processes necessary to assure the proper handling of guarantees (such as, lodging and release of guarantees) throughout the execution of the processes within the Core Business Domains (excluding the Customs Supporting Procedures*).</p> <p>In accordance with the legislation (Art.34 2008/118/EC) the arrangements for guarantees and payment are specified, whereas for duty suspension (Art.18 and part of 19 2008/118/EC), the arrangements are left up to Member State.</p> <p>(*It shall be noted that in the context of Excise, Guarantee Management does not concern the Customs Supporting Procedures.)</p>
Risk Management	This Enabling Business Domain encapsulates all processes related to risk management (i.e., to the identification, assessment, and prioritisation of risks) aiming at detecting potentially fraudulent movements, hence resulting in targeted controls.
Statistics Management	This Enabling Business Domain encapsulates all processes related to the production and maintenance of the business statistics necessary to monitor the effective and efficient execution of the excise operations amongst the Member State Administrations.

Table 4.1: Business Domains

EU Customs Global and Interaction BPM Report	REF: EU Customs Global and Interaction BPM Report for Excise

L1 EXCISE GLOBAL BPM	

4.4. Data

Data Cluster	Definition
Guarantee Data	All data relevant to guarantees, as defined at both Common level (such as, the Guarantor Type Code) and at national level (such as, guarantee types, guarantee status, Guarantee Reference Number, etc).
Excise Duty Paid B2B Movement Data	All data that makes up an excise movement entity under the Duty Paid regime. That is, all information (functional messages) exchanged for a given excise movement under the Duty Paid B2B regime.

L2 EXCISE INTERACTION BPMS FOR CORE PROCESSES	

5. L2 Excise Interaction BPMs for Core Processes

5.1. Model Type Description

The purpose of the L2 Excise Interaction BPM for Core business domains is to show all interactions of a main Core business domain. Those interactions are structured around 4 types of relationships:

- "Is Predecessor Of" between the previous business domain and the main business domain. This link indicates which Core business domain can happen before the execution of the main Core business domain from a procedural viewpoint;
- "Is Predecessor Of" between the main business domain and the subsequent business domain. This link indicates which Core business domain can happen after the execution of the main Core business domain from a procedural viewpoint;
- "Has Input For" between the Global Business Data and the main Core business domain. These links show the data outputs of the Enabling business domains that are used by the main Core business domain;
- "Has Output Of" between the main Core business domain and the Global Business Data. These links show which outcomes of the main Core business domain are used by the Enabling business domains.

EU Customs Global and Interaction BPM Report	REF: EU Customs Global and Interaction BPM Report for Excise
EU Customs Global and Interaction BPM Report	
L2 EXCISE INTERACTION BPMS FOR ENABLING PROCESSES	

6. L2 Excise Interaction BPMs for Enabling Processes

6.1. Model Type Description

The purpose of the L2 Excise Interaction BPM for Enabling business domains is to show all interactions of a main Enabling business domain. Those interactions are structured around 2 types of relationships:

- "Has Input For" between the Global Business Data and the main Enabling business domain. This link shows the data outputs of the Enabling business domains that are used as an input to the main Enabling business domain;
- "Has Output Of" between the main Enabling business domain and the Global Business Data. This link shows which data outputs of the main Enabling business domain are used by the Enabling or Core business domains.

EU Customs Global and Interaction BPM Report	REF: EU Customs Global and Interaction BPM Report for Excise
EU Customs Global and Interaction BPM Report	
L1 EXCISE GLOBAL BPM MATRIX	

7. L1 Excise Global BPM Matrix

7.1. Model Type Description

The purpose of the L1 Excise Global BPM Matrix is to show all relationships between Global Business Data and Core and Enabling business domains.

2 types of relationships are used in this matrix:

- "Has Input For";
- "Has Output Of".
